| Editor Comments: This entry is a combination of two separate items, both identical except that the primary item has only a Wurlitzer serial number, while the latter brief mention has only a Philipps serial number and is not dated, and it is shown separately on an otherwise blank page at the end of the ledger. It is presumed that the later style 17 mention was added to record the Philipps S/N after the primary entry had already been entered, but inserted at the ledger's end without taking the time to search through the ledger to find and annotate the primary entry. |       |          |                        |                             |               |              |             |

| Editor Comments: Serial number might be 2742 or 2743; ambiguous due to odd notation of 2742 with the digit 3 located directly above the last digit in the serial number. The next or following entry in the ledger is serial number 2742, and so this item is being tagged as serial number 2743. |       |          |                          |                             |               |              |             |

| Editor Comments: The M.P.O notation may represent a reconfigured instrument playing Mandolin PianOrchestra rolls. The style 17 PianOrchestra normally used "Regular/Style 17" PianOrchestra rolls, the predecessor to the "Mandolin" and "Concert" type PianOrchestra rolls. |       |          |                        |                             |               |              |             |
